Remote-ready

Objective

15-year-old student and self-taught developer with hands-on experience building full web apps. Skilled in web and backend development, eager to contribute to real projects, and open to remote work or internships.

Skills

- **Web Development:** HTML, CSS, Tailwind, JavaScript, Vue (learning)
- **Backend & Databases:** PHP, SQL, FastAPI (Python), Python scripting
- **App Development & Tools:** Tauri (desktop apps), Rust (learning), Raspberry Pi projects
- **Other:** Git/GitHub, problem-solving, deployment, remote collaboration

Projects

- **ChemLib** – Custom chemistry library web app (HTML/CSS/JS)
- **Automated Watering System** – Raspberry Pi system with sensors, weather API integration, and web dashboard (Python/FastAPI)
- **DocKing (in-progress)** – Cross-platform document management app (Tauri/JS)
- **WebOS** – Browser-based cloud OS with apps, user accounts, push notifications, and single-file app system

Experience

- Built real-world web apps for schools and personal projects
- Integrated backend systems, databases, and APIs for multiple projects
- Learned and applied modern frameworks and deployment practices independently

Education

- Current Student (15 years old) — actively learning coding, web development, and software engineering independently

Extras

- Open to remote work and internships
- Strong self-starter, extremely curious, and fast learner
- Comfortable collaborating in professional settings
